Johnny's Crib is the top level of this Circa 1969 brick and tile home, that has recently had some renovation and refurbishment in respects to the homes era. We wanted to create a 70's experience in this property, showcasing strong blues and bright orange alongside some feature pieces and contrast. At the same time we wanted to keep things clean, simple and practical for short stays. This property is a chefs delight with a brand new funky kitchen!

Great open plan living and dining with elevated views over poinciana trees and period style homes. Each of the 3 bedrooms features quality linen, a choice of pillows, BIR and a dedicated workspace. Fully self contained you can cook beautiful meals, wash your clothes and have a choice of patios for relaxation.

We are just a 5-10 minute walk to restaurants, cafes, shopping and river walks.
